

## Fairburn Fire Department Car Seat Referral Form

Fairburn Fire Department provides education and a car seat to families who financially qualify. Additional details about our program are included below:

### Eligibility for Mini-Grant Program:

1. If a child currently has a car seat, a grant-funded replacement car seat cannot be offered unless one of the following conditions are met: the child has outgrown their current seat, their car seat is expired, their car seat is recalled, or their car seat is missing pieces.
2. The family must provide proof of need. This includes documentation of WIC, Medicaid, Peach Care, food stamps, etc.
3. One seat per child per family. We cannot give multiple caregivers a car seat for the same child.
4. We ask that pregnant mothers are at least seven months pregnant before they receive their car seat.
5. We want to serve families in the county in which they reside. If you live outside of the City of Fairburn, submit the form and it will be forwarded to the appropriate contact person for your residence address. Once the information is received, the program coordinator will send a confirmation email to the family with further details.

Please complete this form in blue or black ink. Please print and write legibly. You will receive a confirmation email from Chief Karlton Ghant with Fairburn Fire Department child protective seat grant program once your information is received.
